

## **Management Declaration**

### **Environmental politics**

*Gomet undertakes to grant the full respect of all the requirements that are requested by the current national, regional and local legislation concerning environment. It undertakes to promote, among the employees and personnel working for it, a sense of responsibility towards environment.*

*It undertakes to adopt all the necessary actions to prevent or remove pollution and reduce to the minimum the production of polluting emissions and preserve the sources, taking into account of possible clean technologies, to improve constantly on the reduction of every environmental impact of its activities.*

*We consider the effects on environment of the activities on course and we have the intention to realize this purpose also for every new activity, product or process with the aim of finding the priorities of intervention and control.*

*The undertaking of Gomet becomes real, translating in aims and programs of improvement, on the significant environmental aspects.*

*We apply procedures of surveillance and control of conformity in the present environmental politics and we make the necessary measurements, constantly recording the results.*

*We keep adequate procedures of emergency.*

*In order that everything is done correctly, we identify the necessity for training on environmental subject of all the staff working in or for the Company and whose work can cause a significant impact on environment and we give them the necessary training.*

*To pursue an open and effective dialogue with all the external parts concerned, we give full availability to supply all the necessary informations to understand the environmental effects of our activities.*

*We undertake to keep a system of environmental management that is in compliance with the requirements of the norm UNI EN ISO 14001:04; for this aim the Direction will supply all the specialistic skills, the human and financial sources to realize and check the system of environmental management.*
