

The Huntsman Group and Huntsman Gomet S.r.l. ("GOMET") recognize in the commitment to safeguard and develop the environment a fundamental and unavoidable value.

The careful analysis of risks and opportunities, ascribable to environmental factors and interested parties, suggests a framework for setting ambitious environmental goals.

The automotive market, in which GOMET has been operating for more than 40 years, increasingly attentive to safety, reliability and respect for the environment, demands that every part of the vehicle actively contributes to the pursuit of these interests.

The inclusion of our site in an area rich in diversified natural elements, a day by day more sensitive civil society, and our professional and competent customers and suppliers, employees and collaborators, are for us a further stimulus.

As Managing Director of GOMET, I herewith confirm my own conviction that the correct management of environmental issues is a fundamental growth factor for our company.

My collaborators and I, through compliance with company procedures and the adoption of specific improvement programs,

commit ourselves to:

- operate in full compliance with current national, regional and local legislation on the environment, trying to implement, where possible, virtuous conduct such as to exceed the requirements of the law itself;
- reduce emissions to a minimum and keep pollutant abatement systems operational and efficient;
- eliminate the risks of spreading on the ground and underground;
- promote a careful use of resources at all levels;
- take care of energy management in order to maximize savings and, where possible, promote the use of energy from renewable sources;
- operate a correct separation of waste in order to optimize recycling;
- deal with any emergency promptly and with preparation;
- give priority to initiatives with a lower negative impact due to the introduction of new technologies, processes, services and activities.

Moreover

- we believe that the continuous training of employees and external collaborators is an undeniable tool for the correct understanding and application of the cause of respect and care for the environment;
- we consider clarity and transparency as reference values for our behavior, and therefore we affirm our willingness to provide useful information for understanding the environmental effects of our activities.

The UNI EN ISO 14001:2015 international standard is an effective reference for us for the application, maintenance and continuous improvement of our environmental management system.

Azeglio, 04/01/2019

A handwritten signature in blue ink, which appears to read "Clemens Bollmann". Below the signature, the name "Clemens Bollmann" and the title "Administratore Delegato" are printed in a small, black, sans-serif font.
