

## ABOUT US

Founded in 1975, Huntsman Gomet has become within the past 45 years a leading producer of spare parts for the automotive aftermarket.

In a competitive and fast changing environment, Huntsman Gomet is aware that continuous improvement, permanent innovation and portfolio expansion are the key.

Our core values are Quality, Integrity and Commitment, to meet Customers' needs and expectations with the best service and reliable products.

**In 2014 Huntsman Gomet became part of Huntsman's Polyurethane business.**

## POWERFUL FEATURES:

- Flexibility
- Range
- Experience

*Our focus is protection!*

## Product Groups:

Cv-Boots as bulk and kits

Steering gaiters as bulk and kits

Dust covers, Bounce bumpers  
and Shock Absorber Service Kits  
("SASK")

MAT+®, Car mats and mats for  
multiple purposes

The range of products offered by Huntsman Gomet, available as both loose items and kits, covers all European and most Asian automotive applications.

The main function of every product is to protect valuable and / or delicate parts against *tear & wear*, damage and pain. Along the lines of **protection**, **Huntsman Gomet** has adopted a diversification strategy to enter new markets. The automotive sector is still the most representative, followed by the accessories for the preservation of the house and garage flooring and the protection of the human body.

### Cv-Boots as bulk and kits

The main function of a CV joint boot is to protect a car's CV joint from damages caused by road debris (as for example sand, stones, salt and water).

In addition, the grease placed in / kept by the CV joint boot is vital for a correct lubrication of the CV joint gear. Available as loose parts or as repair kits, GOMET's range of CV joint boots is the widest one in the market and covers nearly all European and many Asian applications.

Kits are available in plastic bag or in carton box packaging and consist of:

- boot(s) in rubber or thermoplastic material
- metal / plastic clamps
- grease
- additional fitting accessories (if required)

### Steering gaiters as bulk and kits

**Steering gaiters** (a.k.a. as bellows) protect the components of the steering rack thus maintaining key component integrity and ensuring dirt and grit free lubrication and so extending steering rack reliability and life.

GOMET's steering gaiters are characterised by high levels of elasticity combined with excellent wear resistance, utmost geometric precision and total compatibility to the original. All steering gaiters produced by GOMET are available as loose parts or as kits in plastic bag or carton box packaging.

Kits are usually composed of:  
2 gaiters (left and right, made of rubber or thermoplastic material)  
metal or plastic clamps

### Dust covers, Bounce bumpers and Shock Absorber Service Kits ("SASK")

Huntsman Gomet's SASK (Shock Absorber Service Kits) are composed of:

- **Dust Covers** made of thermoplastic material or rubber

- **Bounce Bumpers** made of polyurethane or rubber

and are available in poly-bag or carton box packaging.

The dust cover protects the vehicle's shock absorber piston rod from corrosion and against valve damage often due to stones, grit and salt.

Its bounce bumper (a.k.a. "jounce bumper" or "bump stop" or "spring aid") provides optimum ride stability on frequent and elevated suspension movement.
